ACTION TAKEN FOR THE ANALYSIS OF FEEDBACK COLLECTED FROM FACULTY, STUDENTS, ALUMNI, EMPLOYER, ON CURRICULUM

Feedback collected from Faculty	Number of Questioners	Threshold	Questioners with response below Threshold	Action Taken	Evidence
	12	80% or 2.4	<p>How do you rate the structure framed for entire program?</p> <p>How do you rate the allocation of the credits and contact hours (L-T-P) to the courses?</p> <p>Rate the Size of syllabus in terms of the load on the student</p> <p>How do you rate the composition of the courses in terms of Basic science, Engineering science, Humanities, Discipline core, discipline elective, open elective, project etc.?</p> <p>How do you rate the offering of the electives in terms of their relevance to the specialization streams and technological advancements?</p> <p>How do you rate the relevance of the Text Books and reference books by their International recognition to the Courses?</p>	<p>Being the affiliated college, the Institute cannot take any action. However gaps in curriculum identified and communicated to university through letter.</p>	<p>Letter sent to University regarding Gaps in Curriculum Sample copy attached.</p>
				<p>Faculties are referring books recommended by University, AICTE, NIT, IIT for content delivery. NPTEL lecture notes and video lectures are also referred.</p>	<p>Course Data sheet and Lesson Plan sample copies attached.</p> <p style="text-align: right;"><i>Amal</i></p>

			Rate the courses in terms of sequence of offering considering whether the preceding courses have been covered.	Lesson plan is prepared and course contents are delivered with proper sequence.	Syllabus for the subject where the sequence is not ok and lesson plan for the same subject with topics arranged in sequence is attached.
			How do you rate the evaluation scheme designed for each of the course?	Internal Assessment tools like Quiz, Group task etc conducted	Minutes of meeting to conduct VAC courses attached .
			How do you rate the percentage of courses having LAB components and the domain used for designing the experiments for the LAB components?	<ul style="list-style-type: none"> Additional Experiments in Lab Industrial Certification courses and Value Added courses on Laboratory/ Design skill Conducted. 	Content beyond syllabus Subject code: GE 6757 Subject : Total Quality Management is attached.
Students	10	80% or 2.4	Rate the courses in terms of extra learning or self learning considering the design of the courses	<ul style="list-style-type: none"> Topics beyond syllabus and Gaps in Syllabus are identified and addressed through extra classes or guest lectures. Self Learning is promoted through learner centric approach such as Assignments, Additional Experiments in Lab Facilities and students are encouraged for NPTEL SWYAM MOOC certification. 	Web link for Lab manuals Sample :BS8161 -CHEMISTRY LABORATORY MANUAL is attached.
			How do you rate the used for designing the experiments for the LAB components?	<ul style="list-style-type: none"> Lab Manuals prepared by faculties for each lab is available Additional Experiments in Lab 	Minutes of meeting to conduct VAC courses attached .
			How do you rate the percentage of courses having LAB components?	<ul style="list-style-type: none"> Additional Experiments in Lab Industrial Certification courses and Value Added courses on 	

Alumni	10	80% or 2.4	How do you rate the competencies in relation to the course content?	Laboratory/ Design skill Conducted. Industrial Visits. Inter departmental VET programs, Industry Internship and Industrial certification courses are executed to enhance the skills of the students and make them competent.		
			How do you rate the offering of the electives in relation to the Technological advancements?	Value Added Courses offered		Sample copy of the Value added course details is attached.
			How do you rate the courses which are skills related suiting to the Industry Included into the programs?	Industrial Certification courses, Guest lectures conducted		
			How do you rate the domain used for designing the experiments in terms of the suitability of the Tools to the domain?	Being the Affiliated college, no action can be taken directly for curriculum.		
			How do you rate the experiments in terms of their relevance to the real life application?	<ul style="list-style-type: none"> Additional Experiments in Lab Industrial Certification courses and Value Added courses on Laboratory/ Design skill Conducted. 		Minutes of meeting to conduct VAC courses attached
Employer	10	80% or 2.4	How do you rate the applicability of the domains and the tools used for designing the experiments in terms of existing practices in the Industry?	<ul style="list-style-type: none"> Industrial Certification courses and Value Added courses on Laboratory/ Design skill Conducted.

26 - 10 - 2017

Dr. R. Perumal,
Professor and Head,
Department of Petrochemical Engineering

To
Dr. A. Peer Mohammed,
Chairperson,
Faculty of Technology,
Anna University, Chennai - 600 025.

Respected sir,

Sub.: Submission of suggestions for Syllabus Sub-committee Meeting on 07 - 11 - 2017.

On behalf of JCT College of Engineering and Technology, Coimbatore, I wish to submit the following to consider at the meeting.

- I. The Technology Group UG courses,
(1) B. Tech. (Chemical Engineering)
(2) B. Tech. (Chemical and Electrochemical Engineering)
(3) B. Tech. (Petrochemical Technology)
(4) B. E. (Petrochemical Engineering) and
(5) B. Tech. (Petroleum Engineering)
have many subjects common and the syllabus can be modified such that one common question paper for University examination can be set for all common subjects of all the above courses.

Now it is the practice to set different question papers for different courses.

- II. Since the academic system is CBCS, it is opt to have the common subjects streamlined into a single identity.
- III. As there is no difference except two subjects for the B. E. (Petrochemical Engineering) and B. Tech. (Petrochemical Technology), these two courses can be merged into a single course.

I am submitting these suggestions for efficient running of the courses and also to ease at the University examination procedures as the CBCS system is being introduced.

I am available for further discussions to make an effective syllabus.

Thanking you,

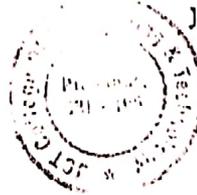

Yours truly,

Dr. R. Perumal,
Professor and Head,
Department of Petrochemical Engineering,
JCT College of Engineering and Technology,

PROGRAM: MECHANICAL ENGINEERING	DEGREE: BACHELOR OF ENGINEERING
COURSE: TOTAL QUALITY MANAGEMENT	SEMESTER: VI CREDITS: 3
COURSE CODE: GE6757 REGULATION:2013	COURSE TYPE: CORE
COURSE AREA/DOMAIN: MANAGEMENT	CONTACT HOURS: 3 hours/Week.
CORRESPONDING LAB COURSE CODE (IF ANY): NIL	LAB COURSE NAME (IF ANY): NIL

SYLLABUS:

UNIT	DETAILS	HOURS
I	INTRODUCTION : Introduction - Need for quality - Evolution of quality - Definitions of quality - Dimensions of product and service quality - Basic concepts of TQM - TQM Framework - Contributions of Deming, Juran and Crosby - Barriers to TQM - Quality statements - Customer focus - Customer orientation, Customer satisfaction, Customer complaints, Customer retention - Costs of quality.	9
II	TQM PRINCIPLES : Leadership - Strategic quality planning, Quality Councils - Employee involvement - Motivation, Empowerment, Team and Teamwork, Quality circles Recognition and Reward, Performance appraisal - Continuous process improvement - PDCA cycle, 5S, Kaizen - Supplier partnership - Partnering, Supplier selection, Supplier Rating.	9
III	TQM TOOLS AND TECHNIQUES I : The seven traditional tools of quality - New management tools - Six sigma: Concepts, Methodology, applications to manufacturing, service sector including IT - Bench marking - Reason to bench mark, Bench marking process - FMEA - Stages, Types.	9
IV	TQM TOOLS AND TECHNIQUES II : Control Charts - Process Capability - Concepts of Six Sigma - Quality Function Development (QFD) -Taguchi quality loss function - TPM - Concepts, improvement needs - Performance measures.	9
V	QUALITY SYSTEMS : Need for ISO 9000 - ISO 9001-2008 Quality System - Elements, Documentation, Quality Auditing - QS 9000 - ISO 14000 - Concepts, Requirements and Benefits - TQM Implementation in manufacturing and service sectors	9

COURSE PRE-REQUISITES:

C.CODE	COURSE NAME	DESCRIPTION	SEM
MG6851	PRINCIPLES OF MANAGEMENT	Learning different functions of management	VI

COURSE OBJECTIVES:

1	To understand Quality Management principles
2	To understand Quality Management processes
3	To understand Quality Management traditional Tools
4	To understand Quality Management modern Tools
5	To understand Quality Management Systems

COURSE OUTCOMES:

SNO	DESCRIPTION	PO(1..12) MAPPING	PSO(1,2) MAPPING
Upon completion of the course, students shall have the ability			
C704.1	Able to understand basic concept of TQM and customer related components and cost of quality	PO3, PO4, PO5, PO8, PO9, PO11, PO12	PSO1
C704.2	Able to apply basic TQM principles in the industrial application and selection of supplier.	PO3, PO4, PO5, PO8, PO9, PO11, PO12	PSO1
C704.3	Able to apply the tools and techniques of quality management to manufacturing and services processes.	PO3, PO4, PO5, PO8, PO9, PO11, PO12	PSO1
C704.4	Able to select the suitable modern TQM tool that can be applied to industry	PO3, PO4, PO5, PO8, PO9, PO11, PO12	PSO1
C704.5	To understand the quality systems followed in the industry	PO6, PO7, PO8, PO12	PSO1
COURSE OVERALL PO/PSO MAPPING:			

PRINCIPAL

JCT College of Engineering & Technology
Pichanur, Coimbatore - 641105

COURSE OUTCOMES VS POs MAPPING (DETAILED; HIGH:3; MEDIUM:2; LOW:1):

SNO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
C704.1			1	2	1			3	3		1	1	1	
C704.2			1	2	1			3	3		1	1	1	
C704.3			1	2	1			3	3		1	1	1	
C704.4			1	2	1			3	3		1	1	1	
C704.5								3	3		1	1	1	
Cxxx*							3	2	3				1	1

* For Entire Course, PO & PSO Mapping

POs & PSO REFERENCE:

PO1	Engineering Knowledge	PO7	Environment & Sustainability	PSO1	Capable of successfully performing national level competitive examinations for higher studies and employment
PO2	Problem Analysis	PO8	Ethics	PSO2	An ability to apply their knowledge in the domain of engineering mechanics, fluid, thermal engineering and advanced technologies in solving engineering problems for the benefits of society
PO3	Design & Development	PO9	Individual & Team Work		
PO4	Investigations	PO10	Communication Skills		
PO5	Modern Tools	PO11	Project Mgt. & Finance		
PO6	Engineer & Society	PO12	Life Long Learning		

COs VS POs MAPPING JUSTIFICATION:

SNO	PO/PSO MAPPED	LEVEL OF MAPPING	JUSTIFICATION
C704.1	PO3, PO4, PO5, PO8, PO9, PO11, PO12, PSO1.	1,2,1,3,3,1,1,1	Helps the students, as part and whole of team, to understand basics about quality and its management concepts. When the students as a fresh engineer, they must know about importance of quality which is the very basic requirement.
C704.2	PO3, PO4, PO5, PO8, PO9, PO11, PO12, PSO1.	1,2,1,3,3,1,1,1	Helps the students, as part and whole of team, in investigating and developing solutions by understanding principles. After understanding the basics, they can able to learn and use tools and new techniques. This capacity will make them aware of quality concepts.
C704.3	PO3, PO4, PO5, PO8, PO9, PO11, PO12, PSO1.	1,2,1,3,3,1,1,1	Helps the students, as part and whole of team, in investigating and developing solutions using tools and techniques. They must learn these new techniques to be a industry ready engineer to fit on the joining day itself. Helps students to equip themselves to solve day-to-day problems encountered in industry.
C704.4	PO3, PO4, PO5, PO8, PO9, PO11, PO12, PSO1.	1,2,1,3,3,1,1,1	Helps the students, as part and whole of team, in investigating and developing solutions using tools and new concepts. They must learn these new techniques to be a industry ready engineer to fit on the joining day itself
C704.5	PO6, PO7, PO8, PO12, PSO1.	3,2,3,1,1	As things change, continuous learning needed. Helps students to update to face real industry and society requirements
Cxxx*			

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS, POs & PSOs:

SNO	DESCRIPTION	PROPOSED ACTIONS
1	Real time approaches to be explored to achieve Customer Satisfaction: customer and customer perception of quality, feedback, using customer complaints, service quality, translating needs into requirements, customer retention, Case studies	Assignment
2	Practical Approach to get Employee Involvement – Motivation, employee surveys, empowerment, teams, suggestion system, recognition and reward, gain sharing, performance appraisal, unions and employee involvement, case studies	Assignment
3	Practical approach to be learn about Six Sigma concepts	Seminar

PRINCIPAL

JCT College of Engineering & Technology
Pichanur, Coimbatore - 641105

PROPOSED ACTIONS: TOPICS BEYOND SYLLABUS/ASSIGNMENT/INDUSTRY VISIT/GUEST LECTURER/NPTEL ETC

TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

1	List of national and International awards in the area of QUALITY
2	Poka- yoke concepts
3	Supply chain Management concept introduction
4	Seven Habits of High effective people
5.	Six sigma case study (Dappa walas of Mumbai)

OBJECTIVES:

The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus. The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modelling the engineering problems mathematically and obtaining solutions. This is a foundation course which mainly deals with topics such as single variable and multivariable calculus and plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I DIFFERENTIAL CALCULUS 12

Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation rules - Maxima and Minima of functions of one variable.

UNIT II FUNCTIONS OF SEVERAL VARIABLES 12

Partial differentiation – Homogeneous functions and Euler’s theorem – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor’s series for functions of two variables – Maxima and minima of functions of two variables – Lagrange’s method of undetermined multipliers.

UNIT III INTEGRAL CALCULUS 12

Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions - Improper integrals.

UNIT IV MULTIPLE INTEGRALS 12 Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Triple integrals – Volume of solids – Change of variables in double and triple integrals.

UNIT V DIFFERENTIAL EQUATIONS 12

Higher order linear differential equations with constant coefficients - Method of variation of parameters – Homogenous equation of Euler’s and Legendre’s type – System of simultaneous linear differential equations with constant coefficients - Method of undetermined coefficients.

60 PERIODS**TOTAL :**

PRINCIPAL

JCT College of Engineering & Technology
Pichanur, Coimbatore - 641105

OUTCOMES:

After completing this course, students should demonstrate competency in the following skills:

- Use both the limit definition and rules of differentiation to differentiate functions.
- Apply differentiation to solve maxima and minima problems.
- Evaluate integrals both by using Riemann sums and by using the Fundamental Theorem of Calculus.
- Apply integration to compute multiple integrals, area, volume, integrals in polar coordinates, in addition to change of order and change of variables.
- Evaluate integrals using techniques of integration, such as substitution, partial fractions and integration by parts.
- Determine convergence/divergence of improper integrals and evaluate convergent improper integrals.
- Apply various techniques in solving differential equations

Minutes of Meeting

Date : 3.6.2014
Time : 3.30 pm
Venue : Principal Chamber
Type : Special meeting to finalize the conduct of Value added courses

Members present

1. Principal
2. HoD – Automobile
3. HoD – PE
4. HoD – EEE
5. HoD – ECE
6. HoD – CSE
7. HoD- PCE
8. HoD- S&H
9. HoD- Mech
10. HoD – Civil

Discussion : 1

Planning to conduct Value added courses for benefit of students of below mentioned branches to enhance knowledge in the relevant field. The HoD's are asked to submit the proposal for conducting value added courses in their respective branches.

Resolution:

Based on the submitted proposals, the management is pleased to approve the following Value Added courses can be conducted for this academic year 2014-15.

Department	Name of the Course
Automobile Engineering	CATIA Modeling
Automobile Engineering	CNC programming
CIVIL ENGINEERING	Basic Site Work & Building Marking
EEE	Course on P-Spice Design
EEE	Low Power Vlsi With Lifting Algorithm
EEE	Course on LABVIEW
Petroleum Engineering	Oil And Gas Offshore Safety Engineering
CSE	Software Testing
S&H	Carrier Development Course

Minutes of Meeting

Date : 1.6.2015
Time : 11.30 AM
Venue : Principal Chamber
Type : Special meeting to take decision on the conduct of Value added courses for the academic year 2015-16

Members present

1. Principal 2. HoD- Mech 3. HOD - CSE 4. HOD - Civil 5. HoD - PE 6. HoD - ECE 7. HoD- S&H.
8. HOD- PCE 9. HoD - EEE 10. HOD - Automobile

Discussion

Planning to conduct Value added courses for benefit of students of below mentioned branches to enhance knowledge in the relevant field. All HoD's are asked to submit the proposal for conducting value added courses in their respective branches.

Resolution:

Based on the submitted proposals, the management is pleased to approve the following Value Added courses can be conducted for this academic year 2015-16.

Department	Name of the Course
Automobile Engineering	HANDS ON TRAINING ON COMMERCIAL VEHICLES
Automobile Engineering	HANDS ON TRAINING ON LIGHT VEHICLES
Civil Engg	ELECTRICAL WIRING FOR INDUSTRIAL BUILDING
CSE	NETWORK SECURITY MOBILE APPLICATION DEVELOPMENT
ECE	Hands on Training on NS2 Simulation and JAVA
ECE	NETWORK SECURITY
ECE	T-SPICE
ECE	ATMEL
EEE	MOBILE APPLICATION DEVELOPMENT
EEE	HANDS ON TRAINING ON " MOTOR WINDING DESIGN"
EEE	HANDS ON TRAINING ON EMBEDDED SYSTEMS
Mechanical	CNC PART PROGRAMMING AND MACHINING
PE	OIL EXTRACTION EQUIPMENTS
PE	ADVANCED MUNICIPAL WASTE MANAGEMENT
S & H	SOFT SKILLS TRAINING AND DEVELOPMENT

Discussion

Planning to conduct Value added courses for benefit of students of below mentioned branches to enhance knowledge in the relevant field. All HoD's are asked to submit the proposal for conducting value added courses in their respective branches.

Resolution:

Based on the submitted proposals, the management is pleased to approve the following Value Added courses can be conducted for this academic year 2016-17.

Department	Name of the Course
AUTO	CATIA MODELING
CIVIL	REVIT ARCHITECTURE
ECE	XILINX
ECE	HANDS ON TRAINING BIOMEDICAL DEVICES & ARDUINO
ECE	SOFTWARE TRAINING
PE	ADVANCED MUNICIPAL WASTE MANAGEMENT
FT	DEVELOPMENT IN EXTRUDED FOODS
FT	GREEN BIO TECHNOLOGY FOR FOOD SECURITY
PCE	ENERGY CONSERVATION MANAGEMENT AND AUDITING
Mechanical	ADVANCED METROLOGY TRAINING
S & H	COMMUNICATION DEVELOPMENT SKILLS

Resolution:

Based on the submitted proposals, the management is pleased to approve the following Value Added courses can be conducted for this academic year 2017-18.

Department	Name of the Course
AUTO	Hands On Training On Commercial Vehicles, PRO/ENGINEER
AUTO	Hands On Training On Light Vehicles, ANSYS
CIVIL	Plumbing For Residential Building
CIVIL	Electrical Wiring For Residential Building
Mechanical	Advanced Technology in Hydraulics
Mechanical	Robotics and Automation
EEE	Course On "MATLAB for Power Electronics", PCB Design
S & H	YOGA
ECE	Image And Signal Processing Using MATLAB
PE	Drill bit design and Perforation Techniques
PE	Oil And Gas Offshore Safety, Oil and Gas Operations, Electrical Resistivity Survey and its applications in Oil and Gas Exploration
PCE	Introduction To Energy Management And Auditing
CSE, ECE	IOT Using RASPBEERY PI
CSE, ECE	ANTROD for Mobile application
FT	High Pressure Processing and Packaging

Semester : VII JULY 2019 to Dec 2019

CBS 2 : POKA –YOKE concept

Over view

A good *poka yoke* definition is simply 'mistake proofing'. Of note, the term *poka yoke* is of Japanese origin and is one of the handful of the more commonly used **Japanese terms** that have become mainstream in Lean circles.

Poka yokes keep **processes** from producing **errors**. Preventing errors obviously improves **quality**, but it also plays a major role in improving **productivity**. With **no rework**, and easier production, **cycle times** and **lead times** both become much shorter. And, of course, faster production with fewer **defects** means lower **costs**.

While the term *poka yoke* originated on the shop floor, it is equally relevant in office, healthcare, and service settings.

Another similar term, *baka yoke*, meaning 'fool proofing', has fallen into minimal use, likely for reasons of political correctness. As an aside, the term *poka yoke* is also frequently used as a verb, as in 'John, can you please *poka yoke* that **fixture**?'

Of note, the last 'e' in the term is often pronounced as a long 'a'.

Mistake-proofing *poka yoke* devices surround people, preventing costly **problems** in their everyday lives.

PRINCIPAL
JCT College of Engineering & Technology
Pichanur, Coimbatore - 641105

Examples of Real-World Poka Yokes

- Car keys are one of the most widely used *poka yoke* devices. They can be inserted with either side up.
- Overflow drains on a sink (the holes high up on the side) are examples of *poka yoke* devices that prevent making a mess when filling the basin up with water.
- Most computer manufacturers *poka yoke* their cables so the plugs only fit in one way. This prevents damage to the system.
- Printers stop printing when the paper is out. This keeps them from spreading ink all over the internal mechanisms of the machine.
- A sensor in a gas nozzle knows when your tank is full. This is a *poka yoke* that prevents dangerous messes by shutting off the pump.
- Your ice maker in your freezer shuts off when the bucket is full.
- Your washing machine ends the spin cycle when it is out of balance.

A *poka yoke* device must make it physically impossible to make a mistake. While *apoka yoke* is often a physical device, such as a fixture that only accepts parts one way, processes and parts can also be designed to have a built-in *poka yoke*.

Some poka yoke examples:

- **Poka Yoke in Parts Design** (primarily in manufacturing)
 - Hydraulic hoses and wiring harnesses can have different size connectors. Hoses and wires can also be cut to lengths that make it impossible to install incorrectly.
 - Parts can be either reversible (no incorrect orientation) or keyed to make sure they will always be installed properly.
- **Poka Yoke Fixture (Physical Device) Designs**
 - Machines can have stops to prevent the wrong raw materials or components from being installed (fixture design).
 - Racks can have only enough spaces to carry the proper number of parts.
 - A scale can be added to a packing station. If the weight was outside of the proper range, software would prevent a label from printing.

PRINCIPAL
JCT College of Engineering & Technology
Pichanur, Coimbatore 641105

- Electric-eye **sensors** can be installed in front of parts bins. The operator must trip them in the proper sequence and quantity prior to a **line shifting**.
- A computer program can prevent entering an order if the zip code does not match the city.

- **Poka Yoke Process Design**

- Two parts that are commonly mixed up can be moved to separate **workstations** to prevent errors.
- The sequence of installation can be changed to prevent one part from damaging another. This commonly happens when large heavy parts are installed over fragile parts, or when tools must be used in tight spaces.

Safety switches are similar to *poka yokes*. The little switch that keeps the microwave from running when the door is opened is a safety device that keeps you from zapping yourself if you try to get your food before the 'ding'. The same is true of dual hand switches on heavy machines that must be pressed for the machine to run. They are great—they keep your hands attached to your body. Just keep in mind that as important as these safety devices are, they don't protect the **output** of the process. *Poka yokes* will protect you *and* deliver uncompromising quality.

Poka yokes can take some precision to **fabricate**. Identify a person that can become an expert on building mistake-proofing devices. Many manufacturing companies have a **tooling** group that is a source of great candidates. Just be careful that they don't over-engineer **solutions**. **Simple** is better.

Most of these examples come from the **shop floor** where *poka yoke* has its roots. Because office processes tend to be more focused on people and software than on parts and machines, there tend to be fewer opportunities for mistake-proofing by frontline employees. Despite this, it is still very important in the office.

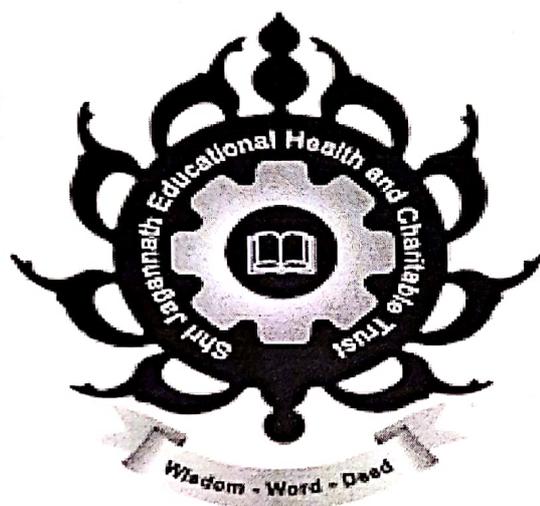

Computers and software are full of *poka yokes*. Field filters might ensure that the proper number of digits are entered for a phone number. A *poka yoke* in a **call center** may sign a person out of if his phone rings more than 4 times without an answer. This keeps the **customer** from waiting. Restricting functionality based on user type (administrator vs. user) is another example.

The Vision and Mission of the Institute

INSTITUTE

VISION

“To emerge as a premier institute for developing industry ready engineers with competency, initiative and character to meet the challenges in global environment.”

MISSION

1. To impart state-of-the-art engineering and professional education through strong theoretical basics and hands on training to students in their choice of field.
2. To serve our students by teaching them leadership entrepreneurship, team work, values, quality, ethics, and respect for others.
3. To provide opportunities for long term interaction with academia and industry.
4. To create new knowledge through innovation and research.

PRINCIPAL

JCT College of Engineering & Technology
Pichanur, Coimbatore - 641105

Program Outcomes (POs)

PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering +practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO 10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO 11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)

PSO1	Capable of successfully performing national level competitive examinations for higher studies and employment
PSO2	An ability to apply their knowledge in the domain of engineering mechanics, fluid, thermal engineering and advanced technologies in solving engineering problems for the benefits of society.

COURSE DATA SHEET

PROGRAM:	DEGREE: B.E/B.TECH
COURSE: PHYSICS AND CHEMISTRY LAB	SEMESTER: I CREDITS: 3
COURSE CODE: BS8161 REGULATION:	COURSE TYPE: LAB
2017	
COURSE AREA/DOMAIN: SCIENCE	CONTACT HOURS: 3 hours/Week.

SYLLABUS:

Sl.	LIST OF EXPERIMENTS FOR PHYSICS	
1.	Determination of rigidity modulus – Torsion pendulum	
2.	Determination of Young's modulus by non-uniform bending method	
3.	(a) Determination of wavelength, and particle size using Laser (b) Determination of acceptance angle in an optical fiber.	
4.	Determination of thermal conductivity of a bad conductor – Lee's Disc method.	
5.	Determination of velocity of sound and compressibility of liquid – Ultrasonic	
6.	Determination of wavelength of mercury spectrum – spectrometer grating	
7.	Determination of band gap of a semiconductor	
8.	Determination of thickness of a thin wire – Air wedge method	
LIST OF EXPERIMENTS FOR CHEMISTRY		
1.	Estimation of HCl using Na ₂ CO ₃ as primary standard and Determination of alkalinity in water sample	
2.	Determination of total, temporary & permanent hardness of water by EDTA method	
3.	Determination of DO content of water sample by Winkler's method.	
4.	Determination of chloride content of water sample by argentometric method.	
5.	Estimation of copper content of the given solution by Iodometry.	
6.	Determination of strength of given hydrochloric acid using pH meter.	
7.	Determination of strength of acids in a mixture of acids using conductivity meter.	
8.	Estimation of iron content of the given solution using potentiometer.	
9.	Estimation of iron content of the water sample using spectrophotometer (1, 10-Phenanthroline / thiocyanate method).	
10.	Estimation of sodium and potassium present in water using flame photometer	
11.	Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer.	
12.	Pseudo first order kinetics-ester hydrolysis.	
13.	Corrosion experiment-weight loss method.	
14.	Determination of CMC.	
15.	Phase change in a solid.	
16.	Conductometric titration of strong acid vs strong base.	
TOTAL HOURS		60

TEXT/REFERENCE BOOKS:

T/R	BOOK TITLE/AUTHORS/PUBLICATION
T	Vogel's Textbook of Quantitative Chemical Analysis (8TH edition, 2014)

COURSE PRE-REQUISITES:

C.CODE	COURSE NAME	DESCRIPTION	SEM
		NIL	

COURSE OBJECTIVES:

1	To introduce different experiments to test basic understanding of physics concepts applied in optics, thermal physics, properties of matter and liquids.
2	To make the student to acquire practical skills in the determination of water quality parameter through volumetric and instrumental analysis.
3	To acquaint the students with the determination of molecular weight of a polymer by viscometry.

COURSE OUTCOMES:

SNO	Blooms' Taxonomy Level	DESCRIPTION	PO(1..12) MAPPING	PSO(1,2) MAPPING
On completion of this course the students will be able to				
C108.1	V. Evaluating	The students will be outfitted with hands on knowledge	PO1,PO2,PO8	PSO1,PSO2
C108.2	VI. Creating	To analysis chemicals quantitatively.	PO1,PO3,PO8,PO9	PSO1,PSO2
C108.3	III. Applying	To analysis water quality parameter	PO1,PO2,PO8	PSO1,PSO2
C108.4	II. Understanding	To apply the basics physics principles of light and sound to evaluate its properties.	PO1,PO3,PO8	PSO1,PSO2
C108.5	I. Remembering	To apply the basics physics principles of thermal physics to evaluate engineering properties of materials.	PO1,PO2,PO8	PSO1,PSO2
COURSE OVERALL PO/PSO MAPPING: PO1, PO2, PO3, PO4, PO5, PO6, PO7, PO8, PO9, PO10, PO11, PO12/ PSO1, PSO2				

COURSE OUTCOMES VS POs MAPPING (DETAILED; HIGH:3; MEDIUM:2; LOW:1):

SN O	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
C108.1	2	2						2					2	2
C108.2	2		2					2	1				2	2

2													
C108.3	2	2					2					2	2
C108.4	2		2				2					2	2
C108.5	2	2					2					2	2
C108*	2.0 0	2.0 0					2	1				2	2

* For Entire Course, PO & PSO Mapping

POs & PSO REFERENCE:

PO1	Engineering Knowledge	PO7	Environment & Sustainability	PSO1	Capable of successfully performing national level competitive examinations for higher studies and employment
PO2	Problem Analysis	PO8	Ethics	PSO2	An ability to apply their knowledge in the domain of engineering mechanics, fluid, thermal engineering and advanced technologies in solving engineering problems for the benefits of society.
PO3	Design & Development	PO9	Individual & Team Work		
PO4	Investigations	PO10	Communication Skills		
PO5	Modern Tools	PO11	Project Mgt. & Finance		
PO6	Engineer & Society	PO12	Life Long Learning		

COs VS POs MAPPING JUSTIFICATION:

S.NO	PO/PSO MAPPED	LEVEL OF MAPPING	JUSTIFICATION
C108.1	PO1	2	Water treatment process is a lifelong process for domestic purposes.
	PO2	2	Knowledge in Ion exchange process used for water softening
	PO8	2	Practical knowledge will support the continuous improvement in their field
	PSO1	2	Can able to understand the water treatment methods
	PSO2	2	To evaluate problems in various water quality methods and the student should have science and engineering knowledge to analyses problems which may be get through their continuous learning.
C108.2	PO1	2	Water treatment process is a lifelong process for domestic purposes.
	PO3	2	New design and development of the tools helps the field improvement

	PO8	2	Practical knowledge will support the continuous improvement in their field
	PO9	1	To analyze the Comparative study of different effience of in different types of fuels.
	PS01	2	Can able to understand the water treatment methods
	PS02	2	To evaluate problems in various water quality methods and the student should have science and engineering knowledge to analyses problems which may be get through their continuous learning.
C108.3	PO1	2	Steady state analysis of single, two and multi machine system may be applied for the consideration for the public health and safety.
	PO2	2	Practical knowledge will support the continuous improvement in their field
	PO8	2	Practical knowledge will support the continuous improvement in their field
	PSO1	2	To analysis the emf value using potentiometer
	PSO2	2	This unit content has a skilled to qualifying in national level competitive examinations for higher studies and employment.
C108.4	PO1	2	To identify the stress-strain for machinery tools and elasticity nature of materials and to find the conductance of the unknown solution.
C108.5	PO2	2	Used to identify the unknown resistance of any material
	PO8	2	Practical knowledge will support the continuous improvement in their field
	PSO1	2	To analysis the strength of acids using pH meter
	PSO2	2	To create a new concept with specific resistance of a given coil of wire – Carey Foster’s Bridge.

GAPS IN THE SYLLABUS - TO MEET INDUSTRY/PROFESSION REQUIREMENTS, POS & PSOs:

SNO	DESCRIPTION	PROPOSED ACTIONS
1	List of different types of modulus exercises.	Seminar
2	Designing a new application of laser in the industrial field	Assignment

PROPOSED ACTIONS: TOPICS BEYOND SYLLABUS/ASSIGNMENT/INDUSTRY VISIT/GUEST LECTURER/NPTEL ETC

TOPICS BEYOND SYLLABUS/ADVANCED TOPICS/DESIGN:

1	Conductometric precipitation titration using BaCl_2 - Na_2SO_4
2	Estimation of copper content of the given solution by EDTA method
3	Designing a model Solar panel and its uses
4	Demo with X-ray diffraction pattern to find the hkl value of the material

INNOVATIONS IN TEACHING/LEARNING/EVALUATION PROCESSES:

1. To find young's modulus for unknown rigid body
2. To analysis different water parameters .

Prepared by

Approved by

SYLLABUS

BS8161 PHYSICS AND CHEMISTRY LABORATORY

CHEMISTRY LABORATORY: (Any seven experiments to be conducted)

LIST OF EXPERIMENTS

1. Estimation of HCl using Na_2CO_3 as primary standard and Determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler's method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Estimation of iron content of the water sample using spectrophotometer (1, 10-Phenanthroline / thiocyanate method).
10. Estimation of sodium and potassium present in water using flame photometer.
11. Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer.
12. Pseudo first order kinetics-ester hydrolysis.
13. Corrosion experiment-weight loss method.
14. Determination of CMC.
15. Phase change in a solid.
16. Conductometric titration of strong acid vs strong base.

TOTAL: 30 PERIODS

OUTCOMES

The students will be outfitted with hands-on knowledge in the quantitative chemical analysis of water quality related parameters.

CONTENTS

Ex. No	Date	Course Outcomes	Name of the Experiment	Page No.	Staff Signature
WATER ANALYSIS					
1		C108.1	Determination of total, temporary & permanent hardness of water by EDTA method		
2		C108.1	Estimation of HCl using Na_2CO_3 as primary standard and Determination of alkalinity		
3		C108.1	Determination of Dissolved Oxygen of Water sample by Winkler's Method		
4		C108.2	Determination of Chloride Content of Water sample by Argentometric Method		
5		C108.3	Estimation of iron content of the given solution using potentiometer		
6		C108.4	Conductometric Titration of Strong Acid Vs Strong Base		
7		C108.5	Determination of Strength of given Hydrochloric acid using pH meter		
ADDITIONAL EXPERIMENTS (CONTENT BEYOND SYLLABUS)					
1		C108.4	Conductometric precipitation titration using $\text{BaCl}_2\text{-Na}_2\text{SO}_4$		
2		C108.2	Estimation of copper content of the given solution by EDTA method

JCT COLLEGE OF ENGINEERING AND TECHNOLOGY
COIMBATORE – 641105

19/11/2018

From

Head of the Department,
Department of Civil Engineering,
JCT College of Engineering and Technology,
Coimbatore – 641105.

To

The Principal
JCT College of Engineering and Technology,
Coimbatore – 641105.

Respected Sir,

Sub : Requesting permission for conducting course on “3DS MAX” - Reg.

In our Civil Engineering department, we are planned to conduct the course on “3DS MAX” software for our third year fifth semester civil engineering students during the semester holidays between 10/12/2018 to 17/12/2018. Hence I request you to kindly provide the permission for conducting the above course successfully.

Thanking you,

Yours truly,

(Kuntar.A)

JCT COLLEGE OF ENGINEERING AND TECHNOLOGY

PICHANUR, COIMBATORE-641105

3Ds MAX

COURSE SYLLABUS

DAY -1 Introduction, Importance of 3Ds Max for Civil/Architecture Students, Creating Standard, Extended, Primitive objects- Creating Doors, Windows and Stairs, Circle, Line and Ellipse etc.- Convert all solid objects into Editable mesh - Convert all shapes in Editable Spline.

DAY -2 Importing AutoCAD File in 3Ds Max, Applying Camera, Lights and Materials in 3D Model view, Rendering Model View using Default Scan line Renderer, Rendering Building View using Mental Ray Renderer.

DAY -3 Lens and Effects in Lights, Creating Road Night views using Spot light and Lens effects, With path and without path Animation of an object in Particular frames, Road Animation creating with Dummy and Camera.

DAY -4 Creating Fire Effects, Inner wall, Inner door with Frames in AutoCAD to Exterior Building Model, Importing Exterior and Interior building model in 3Ds Max, Setting the furniture in rooms according to its requirement.

DAY -5 Walk Through of Building in Exterior and Interior, Creating AVI Movie.

DAY-6 Project work.

FEEDBACK FORM

This *Training Evaluation Feedback Form* is available in a PDF version for printing and filling out by hand; or as a Word document that can be filled out on the computer:

1. How did you attend this training? (check all that apply)

- As an instructor/facilitator
- As a trainee in a group setting
- As a Web-based training in a group setting
- As a self-paced Web-based training
- Other (describe):

2. Was this training?

- Required
- Optional

3. Based on the training course description, how did your learning experience compare to what you expected when you began the training. (check only one)

- Learned much more than I expected.
- Learned somewhat more than I expected.
- Learned as much as I expected.
- Learned somewhat less than I expected.
- Learned much less than I expected.
- Learned nothing new.

4. Please rate how well this training program met your expectations in the following areas:

	One of the Worst	Below Average	Average	Above Average	One of The Best
Course content			✓		
Course materials			✓		
Presentation style			✓		
Joint exercise content			✓		
Open discussions			✓		
Availability of support materials			✓		
Other: (describe):			✓		

5. Would you recommend this training to your colleagues? (check only one)

- Definitely
- Probably
- Not certain
- Probably not
- Definitely not

Respected Sir,

Sub : Requesting permission for conducting course on 'BASIC SITE WORK AND BUILDING MARKING' - Reg.

The Department of Civil Engineering is planned to conduct the training course on "BASIC SITE WORK AND BUILDING MARKING" for our final year civil engineering students. The course period is 10/06/2019 to 17/06/2019. Hence I request you to kindly provide the permission for conducting the above course successfully.

Thanking you,

Yours truly.

BASIC SITE WORK AND BUILDING MARKING
COURSE SYLLABUS

DURATION :30 HOURS (6 DAYS)

INTRODUCTION

Introduction about building construction, importance and necessity of site management and marking, Technical terms of various components of buildings, types of buildings, types of structures, units and measurements, construction tools & equipments and site preparation.

MATERIALS

Construction materials- sand and its types, natural stones, artificial stones, cement and its types, concrete and its types, special types of materials, quality control.

BUILDING MARKING

Units and its conversion, components of various types of buildings, building alignment techniques and its importance, study and execution of building drawings.

LOAD BEARING STRUCTURE

Basic principle, center line marking of load bearing structure- demonstration at site, marking of residential and commercial buildings.

FRAMED STRUCTURE

Basic principle, center line marking of framed structures(column marking)- demonstration at site, marking of multistory buildings and industrial buildings.

PRACTICAL SESSION

Site visit, on marking and alignment of buildings.

Training Evaluation Form

Title of event:

Date of event:

Location of event:

Instructions: Please tick your level of agreement with the statements listed below	Strongly Agree	Agree	Disagree	Strongly Disagree	Not relevant to this event
1. The objectives of the training were met	✓				
2. The presenters were engaging		✓			
3. The presentation materials were relevant		✓			
4. The content of the course was organised and easy to follow	✓				
5. The trainers were well prepared and able to answer any questions		✓			
6. The course length was appropriate	✓				
7. The pace of the course was appropriate to the content and attendees		✓			
8. The exercises/role play were helpful and relevant	✓				
9. The venue was appropriate for the event	✓				

10. What was most useful?

11. What was least useful?

12. What else would you like to see included in this event? Are there any other topics that you would like to be offered training courses in?

13. Would you recommend this course to colleagues? Yes/No Why?

Yes, its useful

14. Any other comments?

No

THANK YOU FOR COMPLETING THIS EVALUATION FORM. FEEDBACK RECEIVED WILL BE USED TO PROVIDE IMPROVEMENTS TO FUTURE EVENTS.
