Ref No: JCTCET/PE/Conslt/002/2019 Dated: January 08- 2019

As per the requisition from **Dr. Venkatesa Prabhu, S/Chemical Engineering, Addis Ababa Science and Technology University, Ethiopia** the sample material (known to be sludge obtained from Tannery Industry) has been analyzed for Selective Constituents.

The work has been done based on tariff basis as service to external candidate.

The report:

Table 1 lists the characteristics of sludge sample on dry basis.

Figure 1 shows the dried sample of sludge.

The characterization study of the sludge showed it to be alkaline (pH 8.7). It was found that the sludge was containing high levels of nitrogen (3134 mg/kg) and phosphorus (2317 mg/kg), and also moderate levels of potassium (381 mg/kg). Calcium and magnesium concentrations in the sludge were 22350 and 9120 mg/kg, respectively. The presence of organic matter in the sludge was comparatively low (3.1 mg/kg). The analysis showed that the sludge was enriched with Chromium heavy metal and considerable content of Iron (15230, and 2180 mg/kg for Cr, and Fe, respectively). These heavy metal contents are extremely high, posing a serious threat to the environment.

To whomsoever it may concern

I am assiduous in designing process equipments used in oil & gas sector / Petrochemical industries. I came to know that your concern is interested in such personals regarding process design. I've designed separation equipments for lab scale in several institutions.

I wish to put forward my proposal to make similar design for your concern as per your requirements. The equipments are designed with maximum precision. It's my privilege to design equipments for your engineering services. Being a Post graduate in Chemical Engineering with ample lab facilities our design has been tested in our institution with small projects in graduate level.

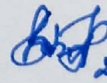

Our institution is a pioneer in Petroleum engineering with management promoting such consultancy services. We offer the following consultancy services.

- ✓ Drilling mud testing and characterisation
- ✓ Upstream & Downstream process equipments design
- ✓ Retrofitting & revamping design

Anticipating your response

Thank You

Yours truly

To

Mr.J.P. Shabil John

Assistant Professor

JCT College of Engineering and Technology.

Dear Shabil

Sub: Regarding your letter to provide consultancy service

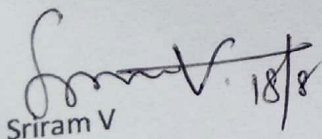

We are delighted to hear from you on behalf of your institution to provide consultancy services. We have received many such offers and the best quote will be provided the service. With reference to your proposal we would like to have your service as a consultant to design the following process equipments.

1. Separation column for methanol system
2. Heat Exchanger

You will have to abide by the rules and regulations of our concern that is attached as an annexure.

Thank You

Best Regards

Sriram V

We are writing to confirm the basis upon which you will provide consultancy services to this concern.

1. Your service as consultant should commence before 20/09/2016
2. As a consultant you will provide us the necessary details of the design and is responsible for the flaws if any.
3. We will provide you with office space and other technical support necessary for your work till the extent of your consulting service.
4. The company will pay you a fee for your services and reimbursement for your travel and accommodation incurred by you in the provision of the services. Any expenses in excess must be authorised in advance and all claims must be accompanied with relevant vouchers and receipts.
5. You will submit an invoice at the end of your service and you will be settled within two days of your claim.
6. You will exercise high degree of skill and care in your service and you will devote as much of your time to the services as may be necessary to carry out efficiently.
7. Your relationship with the company will be that of an independent contractor. You will have no authority to neither incur any liability nor make any commitment on behalf of the company.
