02/11/2020

From

Head of the Department,
Department of Civil Engineering,
JCT College of Engineering and Technology,
Coimbatore -641105.

To

The Principal
JCT College of Engineering and Technology,
Coimbatore-641105.

Respected Sir,

Sub : Requesting permission for conducting course on 'BASIC SITE WORK AND BUILDING MARKING' - Reg.

The Department of Civil Engineering is planned to conduct the training course on "BASIC SITE WORK AND BUILDING MARKING" for our final year civil engineering students. The course period is 20/11/2020 to 25/11/2020. Hence I request you to kindly provide the permission for conducting the above course successfully.

Thanking you,

Yours truly,

SK

CIRCULAR

Dear students

Our department is planned to conduct the value added course on ‘BASIC SITE WORK AND BUILDING MARKING’ for our third year fifth semester civil engineering students during the holidays between 20/11/2020 to 25/11/2020. This is the modeling software course and is very useful for civil engineering graduates.

Due to this point of view all the students are requested to register your name for this course and utilize this facility. The syllabus and time table are available in the department noticeboard.

BASIC SITE WORK AND BUILDING MARKING

COURSE SYLLABUS

DURATION :30 HOURS (6 DAYS)

INTRODUCTION

Introduction about building construction, importance and necessity of site management and marking, Technical terms of various components of buildings, types of buildings, types of structures, units and measurements, construction tools & equipments and site preparation.

MATERIALS

Construction materials- sand and its types, natural stones, artificial stones, cement and its types, concrete and its types, special types of materials, quality control.

BUILDING MARKING

Units and its conversion, components of various types of buildings, building alignment techniques and its importance, study and execution of building drawings.

LOAD BEARING STRUCTURE

Basic principle, center line marking of load bearing structure- demonstration at site, marking of residential and commercial buildings.

FRAMED STRUCTURE

Basic principle, center line marking of framed structures(column marking)- demonstration at site, marking of multistory buildings and industrial buildings.

PRACTICAL SESSION

Site visit, on marking and alignment of buildings.

Short Term Courses

Certificate Course in Web Designing

Objective of the Course:

The course has been designed to provide the basic knowledge for design of the web page / site.

Learning Outcomes:

- A website is Published using application Server i.e. Tomcat/ IIS
- Apply Java script Code to sites.
- Develop Motion Graphic with Flash.
- Apply proper layout and interactive website design.

Duration of the Course 60 hrs
(in hours)

Minimum Eligibility Knowledge of Basic Computer Concept
Criteria and pre-
requisites, if any

Outline of Course

S. No	Topic	Minimum No. of Hours
1.	Introduction to Internet & Web	04 hrs
2.	HTML	15 hrs
3.	DHTML	08 hrs
4.	JavaScript	05 hrs
5.	Flash	06 hrs
6.	Photoshop	06 hrs
7.	CSS	06 hrs
8.	Project on Website Development	10 hrs
Theory / Lecture Hours:		30 hrs
Practical / Tutorial / Lecture Hours:		30 hrs
Total Hours:		60 hrs

REPORT ON WEB DESIGNING

The Department of Electronics and Communication Engineering organized a certificate Program on **WEB DESIGNING (Online mode)**, from 01.03.2021 to 11.03.2021. The resource person for this program was **R.Amarnath, Trainer AVATAR ACADEMY, Erode..** The welcome address was given by Mr.K.Babu, Assistant Professor, Department of Electronics and Communication Engineering. The Introduction about the Chief Guest was given by Ms.C.Vennila, 4th year Electronics and Communication Engineering. The chief guest first gave an introduction about how this concept was used during ancient times which surprised everyone to know how it was implemented in life.

He went through each concept with examples and related stories, how security was affected in various fields. How to be secure in social media and cyber world were also included. He said about the applications to detect the hidden cameras all around us. He insisted about how computers are being affected by malwares and how its functioning changes after affected by such malwares. Then he talked about application development. He talked about how should be aware of increasing web technology. He talked about the job opportunities related to web designing.

We learned a lot from the 10 days Program and were satisfied with the answers from the speaker. Mr.Abijith, 4th year Electronics and Communication Engineering concluded with a vote of thanks.

From,

Mr. S Umarmuktar,
EEE Department,
JCT College of Engineering and Technology,
Pichanur, Coimbatore.

To,

The Principal,
JCT College of Engineering and Technology,
Pichanur, Coimbatore.

Respected Sir,

Subject: Regard the permission for conducting an Value Added Course.

We had a plan to conduct five days Value Added Course on P-SPICE from 16.07.2020 to 20.07.2020, so I humbly request you to grant me permission to conduct the Value Added Course in online mode.

Date: 28.06.2020

Place: Pichanur

PRINCIPAL
JCT College of Engineering & Technology
PICHANUR, COIMBATORE - 641 105.

Yours sincerely,

Mr. S Umarmuktar

SYLLABUS

VALUE ADDED COURSE: P – SPICE

S. No.	Date	Contents	Hours
1.	16.07.2020	Smoke Analysis: This covers the stress analysis tool and involves setting up the components to contain various “smoke” parameters that are essentially the maximum operating conditions that you would see in a device data sheet. This is transient simulation base which is then hand to the Smoke tool for analysis of maximum operating conditions setup within each “parameterized” component.	6
2.	17.07.2020	Sensitivity Analysis: This covers the analysis of how component value deviations would affect a “goal” characteristic for a circuit. Something like Bandwidth or Gain are affected by individual component values of the circuit so by specifying a value tolerance for the components, Sensitivity can tell you how each component value deviation will affect that goal measurement.	6
3.	18.07.2020	Optimizer: This covers the ability to re-characterize a circuit for a different set of performance goals. The Optimizer is given a list of components to vary in a circuit to achieve a different set of measured goal responses, continually altering these component values until the new goal sets are achieved (if that is possible with the given circuit arrangement). It can also operate on a given set of curves to essentially manipulate device values/parameters for a curve-fit situation.	6
4.	19.07.2020	Monte Carlo: This covers the about 98% of the same capability as the PSpice A/D tool, with the exception of the ability to split the positive versus negative tolerance ranges independently, and the ability to plot a cumulative histogram type of performance.	6
5.	20.07.2020	Parametric Plotter: This covers the ability to manipulate any number of device parameters of a circuit. With PSpice A/D, you only have the ability to manipulate (i.e. sweep) two parameters in a given simulation. With the Parametric Plotter, that limitation is lifted and allows any number of parameter manipulations in a simulation.	6

Dear Sir,

Sub: Requesting for Allotting a Certificate course Trainer – Reg...

We would like to bring to your kind notice, that we the department of Food Technology is in need of a certificate course trainer from your company for Extruded Foods. The trainer will be handling classes for the 2nd,3rd,4th year Food Technology students during from 13.09.2021 to 17.09.2021 (5 Days). So I request you to give permission for the above at the earliest.

Thanking you

Yours sincerely

(Dr.G.Gnanavel)

DEPARTMENT OF FOOD TECHNOLOGY

Value added course syllabus: Extruded Food products

Day 1

Demonstration of Extrusion process, development of extruded product based on cereals and pulses

Day 2

Processing of cereal based products, estimate the composition of extruded products,

Day 3

Demonstrate the factors affecting extrusion cooking

Day 4

Preparation of pasta products, packaging practices of cereal based extruded products

Day 5

Trouble shooting in different processes

Report on - Value Added Course: Extruded Food Products 13.09.2021-17.09.2021

The department of Food Technology organized a value-added course on Milling Technology from 13.09.2021 to 17.09.2021. The resource person for this program was Dr.Sathyamoorthy, from Moon Foods, Tiruchengode, Namakkal (DT). The program started with welcome address by Ms. Thamarai M, Assistant Professor. The felicitation address was given by Dr. V.J. Arul Karthick, Principal, JCT College of Engineering and Technology. The introduction about the chief guest was given by Ms. Sweka, 2nd Year Food Technology. The chief guest gave an introduction about the milling technology and the concepts.

We learned a lot from the 5 days program and we were satisfied with the answers from the resource person. Ms. Sweka, 2nd year Food Technology conclude with a vote of thanks.

Syllabus

Value added Course

Onland and offshore challenges for oil and gas exploration

Topics:

1. Coastal sediments
2. Types of On-land Rigs
3. Accumulation of oil in on-land and offshore
4. Complications in offshore drilling
5. Remedies to handle operations smoothly

A handwritten signature in green ink, appearing to be 'S. R. K.' or similar, located in the bottom right corner of the page.

2	Prof.M.Prabhu	Assistant Professor	Mechanical
3	Prof.S.Settu	Assistant Professor	Mechanical

Minutes

- Academic Year 2020-2021 as a part of academics Value added programs has been planned to conduct for the students.
- Classes for a VAC are conducted during the RESERVED Time Slot in a week or beyond the regular class hours
- The value added courses may be also conducted during weekends / vacation period.
- A student will be permitted to register only one Value Added Course in a year.

Sl.No	Name of the Course
1	Computer Aided Drafting And Modeling
2	Robotics Programming
3	CNC Training
4	CREO for Design Engineer
5	New Product Development though EDGE CAM

For this even semester **New Product Development though EDGE CAM** training courses were fixed for 3rd year.

- All students are encourage to attend this value added programme to enhance the knowledge.

DEPARTMENT OF MECHANICAL ENGINEERING

Course Module – VAP

NEW PRODUCT DEVELOPMENT THROUGH EDGE CAM

MODULE 1: INTRODUCTION

Process involved in New Product development – CNC Machining – CAM System.

Duration hr: 5 Hrs

MODULE 2: DRAWING STUDY

Drawing layout - Type of projection - Type of views -Type of Tolerance - Limits & Fits - Geometrical Dimensioning & tolerance - Surface finish Symbols.

Duration hr: 5 Hrs

MODULE 3: PROCESS PLANNING

Process – 4M Process Planning –axis –Type of CNC Machine – CNC machine selection – Process flow – Process sheet preparation – Cutting tool selection for Turning & Milling – Cutting parameter calculation – G Codes & M codes – Different type of operation in Turning & Milling –Basics of Fixture Designing - Advanced technology in CNC Machining

Duration hr: 10 Hrs

MODULE 4: COSTING & METROLOGY

Costing – Cost estimation for CNC machining process – Machine Hour rate –RFQ Preparation Gauges &Measuring instruments

Duration hr: 5 Hrs

MODULE 5: CAM SYSTEM

Basic of CAM system – Introduction to Edgecam Software –Interface between CAD to CAM – NC code Generation - 2 axis Turning Module – Turn Mill Module (X,Z,C,Y), 3 axis Milling Module - 4 thaxis Milling Module – Introduction to 5 Axis.

Duration hr: 5 Hrs

Total : 30 Hours
